

I am an avid radio listener and my listening time is spent mostly on local radio stations with 20% of my time on listening to satellite stations. I am also a businessman and when my competition steps up and trys to take over some of my business I take the opportunity to grow my business to provide better service to my customers so that they do not want to do business with my competition. I don't go and cry to the federal government!! XM radio has the right to expand its market share by providing local programming. The NAB needs to grow up and deal with their competition directly by providing a better or a new service.Thanks
